Acknowledgements/Podziękowania

My academic experience in the Netherlands started with a five months Master internship at the Molecular Genetics Department at the University of Groningen, where prof. Oscar Kuipers accepted me in his group. Therefore, my first thanks go to Prof. Kuipers for showing me the broad perspectives in science. During this time under the supervision of Dr. Anja de Ridder, I learned a lot about experimental techniques.

Soon, the opportunity given by Prof. Arnold Driessen in the Molecular Microbiology Department, where I conducted the research described in this book, appeared. I would like thank you Prof. Arnold Driessen for the PhD position in your group and for promoting my experiments throughout all these years.

The decision to pursue the PhD was greatly encouraged by Prof. Antoni Polanowski of my Master study at University of Wrocław, in Poland: you have my profound gratitude.

There are many professors who influenced my research:

I am grateful to Prof. Roel Bovenberg for your usually critical, yet thoughtful questions during project meetings.

My kind words also go to Dr. Rob Vreeken, for your input during the collaboration meetings.

To Prof. Ida van der Klei: I really appreciate your involvement during the IBOS meetings (Integration of Biosynthesis and Organic Synthesis).

And I owe my gratitude to the assessment committee for evaluating my thesis: Prof. Han Wösten, Prof. Lubbert Dijkhuizen, and Prof. Oscar Kuipers.

I would like to thank Dr. Florian Maire and Dr. Marco Ries for analyzing my samples at Leiden Academic Centre for Drug Research. Your outstanding professionalism and work ethics has made this research possible. At this time of my defence I want

to thank you for your irreplaceable support!

Starting my PhD in Haren with my great office mates Emilia Pachulec and Samta Jain: what began with little tips continues with friendship up to this day, despite you both moving to two different continents. Thank you for our chatting and all the adventures (biking, parachuting, and India escapade :-).

My thanks also go to former and current members of the whole MolMic group -you were all part of my experience-, and to the past and present colleagues of the so-called "Pengroup", for creating a unique atmosphere: Stefan, Oleksandr, Hyun Yong, Reto, Andriy, Fabiola, Susan, Marta, and Jeroen. Oleksandr Salo, good luck with your thesis! And Hans Wolsink, it was a joy to supervise a student like you.

I am very grateful to Prof. Gerald de Haan and his Ageing Biology and Stem Cells group at the UMCG, for the opportunity of being a guest researcher in his group: I'm fortunate for this time since it was very useful for my current study at the Silesian Medical University in Poland. Special thanks go to Dr. Karin Klauke and to Johannes Jung for your guidance during this time.

Gosia Kopacz and Alicia Lammerts van Bueren I am so glad to have paranymphs like you! Thank you for your care before and during my defence day.

And thanks to the secretaries, especially Bea and Manon for facilitating sending the parcels of samples, as well as making all the necessary arrangements leading to my defence day.

My Groningen experience reached beyond the lab work:

During my Erasmus internship I met Aleksandra Mirończuk and Adam Dobrowolski: thank you for your hospitality in that period. Your presence in Groningen made a big difference.

Sanna op den Dries, Magda Czepnik and Magda Wojtaszek: it was a blessing to find your friendship in Groningen. Thank you for all our dinners and conversations. Sanna all the best in Auckland, Magda Cz. good luck in Cincinnati, and Magda W. in Shell! Magda Wojtaszek, thank you so much for your great support with LaTeX: this book would not look as good without your help.

Marto Walasek, dziękuję za Twoją inspirację programem Erasmus, z którego razem zdecydowałyśmy się skorzystać wybierając Groningen. Thank you for sharing the apartment in Groningen, our small parties, also in the garden, and your support

that time. And Thomas Maassen, the pictures taken by your cool camera are in this booklet.

I also want to say thanks to my friends I met at the St. Joseph cathedral church: Kamila, Francesco, Noreen and Jarek, Kurian, Esther, Michael and Manon, Mark and Kitty.

After the lab time, Groningen allowed me to discover another recharging activity: I would like to thank my dear teachers Peter and Ina for introducing me to the beautiful art of dancing at the Argentine Tango School. Rogier, Carina, Carolien and Joop, Dusko, and of course, my dance partner Erwin Ten Meer: thank you for all the "salons".

Then there are the friends I could share a very good time with: Justyna D. (your help really expedited these last few weeks), Ania St., Kasia Sz., Magda and Łukasz, Alim, Allard, Annika, Marcin, Joanna, Marieke, Ania Si., Nathalie, Edyta, Marta H., Anette, and Marta S., Bianca, Ellena, Jacek, Justyna N., and many more not mentioned here but who are reading this now and were part of my journey.

To my dear Elizabeth and Graham: my first steps towards being an truly international person were made many years ago with me visiting you in England, and now you honour me with your presence at my defence.

Pragnę wyrazić swoją wdzięczność wszystkim, którzy udzielali mi wsparcia będąc w Polsce, szczególnie na tym Najwyższym poziomie. Za niesamowitą wiarę we mnie chciałabym wymienić ś.p. wujka Norbeta, a także ciocię Ewę i wujka Bolka.

Last, but not least to my whole family. Kochani rodzice: dziękuję za Waszą miłość, zaufanie oraz akceptację moich wyborów, za Wasze zawsze otwarte ramiona podczas moich każdorazowych powrotów. Dziękuję też mojemu rodzeństwu: Aleksandrze, Ludmile, Kamilowi i Pawłowi, za Waszą obecność w tym dniu. Ola za Twoje odwiedziny i wsparcie, Marek za przeprowadzkę. Ludmiła za Twoją bezcenną pomoc i zrozumienie. Sławek, Paweł i Bartek za tak ostatnio potrzebne działania remontowe;-) Za radość dziękuję najmłodszym: Magdzi, Martynie, Julii i Kornelowi.

Agato, Nikodemie, Dominiko to Wam dedykuję to dzieło.

Marta Samol
